Caesarstone quartz – beauty and strength combined

Quartz is more than beautiful. It is also one of nature's strongest minerals. Impervious to stains, scratches and cracks, quartz is highly heat and cold resistant. Caesarstone surfaces combine form and function, allowing for the most diverse, durable and practical applications. Our surfaces retain the cool, tactile qualities of natural stone, while offering design freedom with almost unlimited application possibilities.

Since 1987 Caesarstone has been pioneering with quartz, developing thousands of designs and launching hundreds of successful new products, with more in the pipeline each and every year.
